

A horizontal hyperbaric chamber with (a lot of) room to breed.

The YADA 42 horizontal chamber is ideal for a restful session allowing for a lying or sitting position. Its size provides enough space for two people to benefit mutually from the treatment.

Its spaciousness is optimal for users suffering from claustrophobia and for families wishing to accompany their children during the sessions. It's easy to operate without the assistance of a second person.

Manufactured entirely using materials certified as safe and of superior quality

5-year warranty on the product.
